

Condensate removal timer

P992087

PRESENTATION:

The condensate removal timer is a plug-on controller specially design for drain valves. The unit offers an easy time cycle programming. The draining time can be set via the "ON" trimmer between 0.5 and 10 seconds. The "OFF" trimmer allows to adjust the delay time between two draining cycles from 0.5 to 45 minutes. The unit is ready to control the valve as soon as the power is switched on. The ON/OFF sequence will be repeated so long as the unit is fed. Two LED's indicate the output status. A "TEST" button is provided to check the cycle settings and to restart the control sequence from the output status "ON".
